PLAN

A d o p t - A - M o n u m e n t

Adopt a "Heritage Railway Stations" program is to find concerned organizations and interested companies that could "Adopt" these Heritage Railway Stations to Perform Critical Preservation work and maintain the Heritage Buildings in good condition. If the lack of feasibility for the aforementioned solution prevails, one can turn to the adaptive re-use of the structure. As mentioned earlier, function based expansions can be made while the old structure can be converted into community spaces such as a library, a museum or a gallery to facilitate the people's understanding of the cultural and architectural history and heritage of the past.
